

AMD Direct HEAT-DISPLAY-BKT

CAUTION: This unit is heavy. For safety, it is recommended for at least two people to install this unit.

Step 1: Place the panel in front of the heater arm vertically, with the two holes for the bracket mount at the top just below the heater (see fig 1).

Note: It may be easier to affix the panel by preassembling one screw, one wingnut, and one bracket to each designated installation location.

Fig 1

Step 2: While holding the panel in position, place the brackets on the back side of the heater arm, and affix the panel to the brackets using one screw and one wingnut on each side (see fig 2).

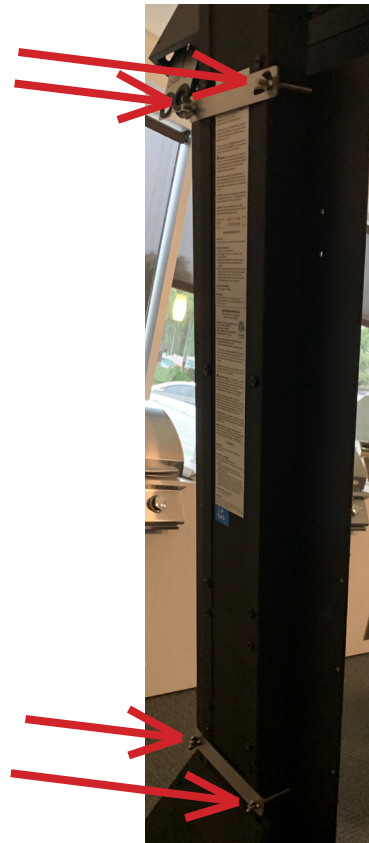

Fig 2

Step 3: After panel is tightened down to heater arm, affix the additional heaters to the panel as shown in the AMD-DIMPLEX handout.
